

# BRICKS

132 PRESETS FOR REPRO

Heckmann Audio GmbH • Berlin

# Bricks

132 sounds for your Repro synthesizers...

With unmistakable influences from recent trends in underground Hip-Hop and Dark Trap, Bricks is a modern, aggressive, lo-fi soundset for Repro.

With its dusty basses, sombre pads and fractured leads, the urgency of this soundset is underscored by the Repro FX section's ability to add 'wear and tear' to its analogue tones.

Bricks for Repro is NKS-ready, including audio previews.

If you have not done so already, please download the [latest version](#) of Repro from [u-he.com](http://u-he.com), and install both synths before loading Bricks.

## Installation

Drag & drop the *Repro Bricks.uhe-soundset* file into the user interface of either Repro-1 or Repro-5 (anywhere will do). This will install the appropriate Bricks presets to both plug-ins.

If for whatever reason this method does not work on your system, try the following: In either Repro-1 or Repro-5 click on the **u-he badge**, select *Install Soundset...*, navigate to the *Repro Bricks.uhe-soundset* file and confirm.

For more details, please refer to the section *Installing Soundsets* in either of the Repro user guides.

## NKS

Bricks is NKS-ready, including audio previews for each preset.

After installing Bricks, load Repro-1 as well as Repro-5 into your NKS host via the product selector. A "Bricks" entry should appear in the Bank menu below each Repro icon. If you don't see those entries, rescan the Repro presets: Go to Preferences / Library / Factory, select "Repro Factory" and click on the [Rescan] button.

Note for **NI Maschine** users: Due to Maschine's lack of aftertouch support, that particular performance feature will not work in any of the presets.
